Over 100,000 litres / 22,000 imperial gallons / 26,420 US gallons / 100m ²		POA		POA
Barriers and tank filling and emptying		POA		POA

Compressed air

QTY Early discount QTY Within 28 days

Compressed air supplies are installed to the stand only.

Final connections to your stand equipment must be carried out by the client's own competent installers.

The compressed air supply is through a flexible hose and can be terminated with either a 3/4" BSP isolating valve, a 3/4" BSP isolating valve with 1/2" or a 1" BSP isolating valve. The compressed air supply is maintained at a pressure between 5 and 6 bar (75-90 psi) subject to normal control fluctuation. The maximum capacity of a supply is 6 litres per second (80 cubic feet per minute) of free air. The compressed air supply is of industrial quality containing normal levels of contamination from oil, water and particulate matter. Users requiring pure compressed air must supply their own filtering, drying and regulating equipment to obtain the quality of air required.

Compressed air with standard 3/4" isolating valve		£800		£960
Compressed air with standard 3/4" isolating valve and 1/2" reducer		£822		£986

Gas

QTY Early discount QTY Within 28 days

All gas supplies are installed to the stand only. Final connections to equipment must be carried out by your own competent installers. The competent person employed by the stand holder must be Gas Safe registered and must provide evidence of this to the venue installation teams before work commences.

The gas supply is through a flexible hose and terminated with a 1" BSP internal thread isolating valve. Natural gas is supplied at a pressure of 22mm Hg or 12" Wg with a flow rate of 2.5 L/s or 300 c.f.h. Any person carrying out work involving the installation, maintenance or checking of gas appliances (or associated fittings) must be competent under the Gas Safety (installation and Use) regulations 1998.

Natural gas 1" BSP internal thread isolating valve		£880		£1,056
